

SPECIFICATION OF ALUMINIUM INGOT A7

Specifications for Aluminum ingots A7

Grade : AL 99.07%

- 1. AL : min 99.7% 2. Fe : max 0.16%
- 3. Si : max 0.10% 4. Cu : max 0.01%
- 5. Ga : max 0.03% 6. Mg : max 0.02%
- 7. Zn : max 0.03% 8. Others : max 0.03%
- 9. Total : 0.30% excluding AL

SIZE: 500 MM X 100 MM X 100 MM

Products Name: Pure Aluminum Ingot A7

Chemical Composition: AL A7

Weight: 20/25 kg,

Place of Origin: Cameroon.

Appearance: silvery white

Aluminum Ingot for remelting is produced by molten salt electrolysis method using alumina and cryolite. The surface of ingot is clean and smooth.
